

Universal Two-Way Radio & Speaker Microphone Hanger

Compact PET-G mounting accessory for handheld two-way radios, speaker microphones and mobile radio microphones.

Product Type	Universal radio / microphone hanger	Material	PET-G thermoplastic
Manufacturing	3D printed	Colour	Black
Mounting	Prepared for screw mounting	Origin	Made in Türkiye

Product Description

The NEA Universal Two-Way Radio & Speaker Microphone Hanger keeps radio communication equipment organised and easily accessible. Its universal form allows handheld radios to be suspended using their belt clip and provides a practical hanging point for button-type speaker microphones and mobile radio hand microphones. It is intended for vehicles, marine environments, workshops, security points, radio rooms and other professional communication installations.

Key Features

- Universal belt-clip hanger for handheld two-way radios
- Suitable for button-type speaker microphones and mobile radio hand microphones
- Durable PET-G thermoplastic body, manufactured by 3D printing
- Compact and lightweight design
- Prepared mounting hole for screw installation
- Suitable for vehicle, marine, workshop and fixed-installation applications
- Manufactured in Türkiye

Material & Durability

Manufactured from PET-G based thermoplastic. PET-G combines mechanical durability with resistance to heat-related deformation, making the product suitable for normal vehicle-interior, marine, workshop and indoor operating environments.

No absolute maximum operating temperature is specified because thermal performance depends on the PET-G filament grade and production parameters.

Installation & Package

The hanger includes a prepared mounting hole for mechanical fastening. On suitable surfaces, an appropriate high-strength double-sided mounting tape may be selected by the installer. Package: 1 hanger. Mounting screws, wall plugs and adhesive tape are not included.

Wholesale / OEM Supply

Available for wholesale supply. OEM / private-label production and bulk packaging can be discussed for volume orders. Minimum order quantity and commercial quotation are provided upon request.

Compatibility: Universal mechanical accessory. Compatibility depends on the belt clip or microphone hanger geometry of the equipment. No specific radio-brand compatibility is claimed unless separately confirmed.
